Methodist Church Building Notes

The workmen on the new Methodist church are making good progress. The outside work is practically done with the exception of the windows. The cement steps are now being laid. On the inside, the scaffolding has been taken down, leaving the overhead work in the auditorium completed. The ceiling is braced with timbers and iron rods, which are so placed as to give both beauty and strength. In the center hangs an immense circle nearly ten feet in diameter, hung with chains and set with twelve lights. There will also be one large light in the center of the circle. The ceiling is Oregon pine, natural stain. The walls, up to a height of seven feet, are being paneled with a beautifully grained pine and stained dark. Above the woodwork is plaster. The building committee had expected to leave the plaster the natural color but the head painter suggested that it be tinted a light tan and he, Mr. W. H. Osborne, 74 North Seventh street, San Jose, and his men, H. Corey and O. A. Dodge, agreed that they would each contribute a day's work if some one would raise the money necessary for the material. Their kind offer was accepted and the amount was quickly subscribed by a few of the church members and the job was done. The result is a beautiful combination of colors in the auditorium.

The floor in the Sunday school room has been laid and the big sliding doors put in place. Contractor John Johnson and his men are now at work around the pulpit and choir loft and placing the side panels.

The heating apparatus will be the best. The contract for the furnace was let to the Schmidt Heating and Ventilating Co., of Oakland, who are said to be the greatest hot air merchants on the coast. Their furnace is guaranteed to heat the church comfortably during the coldest day in the winter, and they give bonds to insure the work. Mr. Schmidt will be here personally to superintend the placing, etc.

Meat Business Changes Hands

The Campbell Meat Market, run by Bulmore & Sawyer, this week came into the hands of Jas. Kelly and S. R. Weeks, and the firm name will be Kelly & Weeks. The new deal is the result of a series of business deals. J. D. Sawyer purchased the interest of Al Bulmore and traded the entire business for the real estate business of a man named Little at 4054 Piedmont Avenue, Oakland. Mr. Little had it planned to trade the meat shop to another party but the latter man failed to keep his agreement and Mr. Little sold the shop to S. R. Weeks, proprietor of the New Market, and James Kelley, late of the Farmers Union. Mr. Weeks immediately moved his stock to the new location and Mr. Kelley donned the white apron. The experience of these men combined with their always courteous treatment of the public will insure success to the venture.

J. D. Sawyer made the new arrangement in the interest of his son Roy who will go to Oakland and take up the real estate work. J. D. will continue his work with the Fraternal Aid Association.

Pundita Circle

The Pundita Circle met at the home of Mrs. F. Savage Nov. 28 with a good attendance. Because of the continued illness of the President, Mrs. Nelson, the meeting was called to order by vice-president, Mrs. Olds. After a short business session the following program was given: Sketch of Carlyle's life; Roll call, answered by quotations from Carlyle; Current events; Sketches of Gov. Bidwell and John Muir.

New Grocery Business

F. O. Putnam this week received a large shipment of groceries to add to his line of business. He expects soon to give up his work at the drier and devote his entire time to the store work.

Well, Hardly

"The Campbell Interurban Press was enlarged last week from a six to a seven column folio, all of which goes to show that Campbell is forging ahead, and for this forward movement credit is due the Press."—Los Gatos Mail.

For Sale

A set of good double work harness, $15.00. A two-horse wagon with springs and fruit rack, $65.00. Address, G. W. Gardner, Dry Creek Road and Johnson Avenue, Campbell.

$100 Reward, $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

Local and Personal

Miss Gertrude Cook of San Mateo was home this week.

Improvement Club will meet next Monday night, at 8 o'clock.

Mr. Ohlen is erecting a cottage on Sunny Oaks avenue, near Virginia avenue.

The Rev. G. E. Atkinson and family went to Capitola last Monday for the week.

Miss Irene Setzer of Sunnyvale was the guest of Miss Irene Putnam this week.

Mrs. S. G. Nelson, Virginia avenue, has been ill for several weeks but is now improving.

Buy your Xmas presents at the Ladies Aid Bazaar on Dec. 7th. Cafeteria dinner in the evening.

FOR RENT, furnished cottage, new, 3 rooms, bath, closets, etc., fine location. Enquire at Press Office.

Mrs. Wm. Donaldson left last Wednesday for Biggs to pass Thanksgiving with her son W. H. Donaldson.

Mr. and Mrs. Isaac Zion spent Thanksgiving with their nephew T. B. Bridges, and other relatives in Oakland.

The Rev. H. C. Langley came home last Monday from Farmington to remain over Thanksgiving with his family.

Mrs. Wm. Beattie has been suffering considerably this week with sciatica, and for some days was hardly able to move.

Mr. and Mrs. E. D. Harris and Mrs. Waters, their guest, drove to Santa Cruz last Wednesday, for a sojourn of several days.

The Second streets residents are getting the improvement spirit and it is expected that cement sidewalks will be the first material result.

Commencing on December 1st and continuing until March 1st, 1912, the Campbell Rochdale Store will close each evening at 6:15 P. M.

TO EXCHANGE—Some very choice residence property in Pacific Grove to exchange for property near Campbell. Address Box 54, Pacific Grove.

Mr. A. W. Johnson and family from San Jose have just erected a cottage near the switch south of town, where they moved in last Saturday.

J. Springer is building a cottage on the Los Gatos road opposite the old Moore place, a half mile south of town. He is being assisted in the work by J. Dick. Both of the men are in the government service at Fort Baker.

The rapid increase of the population of Campbell this week was the direct cause of a material increase in the cigar business. Some have been wondering if it will have a tendency to increase the price of wood and coal.

Mr. E. D. Harris returned Sunday after a two weeks' visit a Point Arena, where he has a ranch, and at other northern points. His son and daughter, Frank and Florence, accompanied him but remained to return later. Mrs. Waters returned with Mr. Harris for a visit here.

S. Abrams has sold his place of seven acres on the Los Gatos road to Thos. Kinnear, of San Jose, who will take possession next week. Mr. Abrams came here from San Francisco last spring after selling his business interests there, and improved this place with the thought of making it his home but a firm in the City with whom he was associated for many years wanted him back in the business. This community loses a good man.

The dust arising from the streets of Campbell had become almost unbearable and the business men and citizens were beginning to wail for rain when, on Monday afternoon, a low rumble was heard from the west and soon the glad sight of Russel Rucker and his water wagon appeared. It is marvelous what a change in the atmosphere and in the spirits of people a little water will make when applied to the dusty streets of a town. It is likened only to that change wrought in the character and conduct of some people when their burning throats are allowed the free used of nature's true beverage.

Christian Science Services

In Odd Fellows' Hall every Sunday morning at 11 o'clock. Subject for December 3—God the Only Cause and Creator. Sunday School at 12:15. The public is cordially invited.

Improvement Club Hold Busy Session

The Improvement Club met in the Library building last Monday evening. In the absence of President Wilson, R. K. Thomas, vice president, took the chair.

Mr. Thomas made a brief report for the Park committee.

The committee on electric lights reported that a new light had been installed at the corner of Campbell Av. and Second St. and that the Railway Co. had agreed to give the extra servic without any additional charges, provided the citizens pay for installing the light. The company had five men at work on our streets for a day and a half improving the service and charged but $20.00, which amount was raised by the citizens.

It was intimated at the meeting that North Second street would soon be laid out into lots and put on the market for sale. A sidewalk will be laid on the east side from Campbell avenue north to Minna street.

A communication from the California Development Board was read and the secretary was requested to have the same published. The letter will appear in the Press next week.

Bazaar and Cafeteria Dinner

On next Thursday, Dec. 7th, the Ladies of the Methodist church will give a Bazaar of fancy and useful articles, also a Cafeteria Dinner. The sale takes place during the afternoon and evening with dinner commencing at 5:30. This meal will be served in cafeteria style with cafeteria prices and will consist of hot meats and vegetables, salads, pickles, olives, etc., brown and white bread, pies, cake and ice cream, also tea and coffee. The ladies have worked hard in arranging for this affair and would like your liberal patronage. Come out and get your money's worth and also lend a hand in helping along the new church.

At the New Coffee Club, Thursday afternoon and evening, Dec. 7.

Taffy Pull

A company of young ladies composing an embroidery club invited in their boy friends and all enjoyed a taffy pull at the home of Miss Muriel Palmer last Tuesday evening. There were 25 or 30 present. Charades and music were a feature of the evening. At a previous meeting of the club someone suggested that the name be the "Lafeyette Club," because of the fact that the time at their meetings was largely taken up with laughing and eating.

Notice to Patrons

Commencing on December 1st and continuing until March 1st, 1912, the Campbell Rochdale Store will close each evening at 6:15 P. M.

P. G. Keith had a severe fall last Wednesday and is now obliged to lie in a sand pack.

We wish to inform our many friends of Campbell and vicinity that we are now putting in an up-to-date

Grocery Department

carrying the very choicest of eatables, and when value is considered you will find our prices are **"always the lowest."**

The installation of this department will by no means weaken our Dry Goods Line as we intend to study the wants of the people and build up this feature until we have accomplished our purpose, by having a store that Campbell will well feel proud of.

Christmas Goods are now coming in and we most cordially invite your inspection. See them before buying elsewhere. We have added many new lines and will try and tell you about some of the new things in the next issue of this paper.

We thank our many customers for their loyal support in the past, and kindly ask for a continuance of the same. As we have said "The Success of This Store depends upon Your Patronage." We shall endeavor to do our part by offering good values to the public.

SHOWS VALUE OF SILENCE

Too Much Talking Has Been the Cause of Many Failures in Business.

Many of the failures in business and professional as well as social life are due to injudicious talking. A young man of apparently very moderate ability has recently astonished his fellow workers by his noticeable success in business. "Pure luck" it has been called, but a policy or natural habit of silence is the real cause.

In his first position he succeeded a man of long experience and excellent judgment, a circumstance that made his youth and inexperience conspicuous by contrast. He made no apologies and asked little advice. He was courteous to his superiors, considerate of his business inferiors, but absolutely deaf to all the gossip and irresponsible talk so prevalent in every large business office.

He had held his position for a year; gossip had it that he had failed, for in that time he had not suggested a single innovation or enlarged his department in any way. But soon it became known that he had proposed a change that would result in an annual saving of $2,000. Gradually his step became firmer, his manner more assured, and he no longer outstayed the janitor at night. Slowly but surely he gained the confidence of the general manager and the heads of other departments, and it soon became their habit to come to him for advice. At the end of five years, when his former associates were wondering if they could afford to get married, he was admitted to membership in the firm.

In every establishment where a number of persons is employed there is always an undercurrent of gossip. A dissatisfied stenographer talks her troubles over with a bookkeeper. The bookkeeper confides to the telephone operator that he expects to get an increase in salary. The elevator boy explains that he is going to leave soon for a better job. These bits of news are exchanged until they become common property.

The employer, learning that the stenographer is dissatisfied, tells her that she may leave at her pleasure. The bookkeeper fails to get his increase in salary and the elevator boy does not get his "new job." Especially if you are dissatisfied should you refrain from discussing your position.—Youth's Companion.

Possesses All the Virtues.

A muscular maiden, Mdlle. Mallery, a few days ago received the Rosiere's prize at Vinay, near Grenoble, France. A "Rosiere" is a maiden possessed of all the virtues, on whom, on that account, a dowry is bestowed either by the mayor and corporation of her native place or by some benevolent donor. There are innumerable Rosieres annually in France, almost one for every hamlet; but Mdlle. Mallery stands out from the rest. She is not only virtuous, but strong. She is six feet tall, and she can easily juggle with weights of one or two hundred pounds. Her feats of strength are many. One day one of her father's farm hands drove up with sacks of wheat. One of them was too heavy for him, and he asked for help. Mdlle. Mallery smiled, and brushed him aside. She lifted the sack, weighing over 220 pounds—as if it were a feather, shouldered it, and carried it into the granary.

Merely the Wrapper.

When the patriarch of Venice became the present pope one of his old friends, a rich Jew from Venice, went to Rome and had a long audience with him. The pope asked for news of all his friends, and when he heard that a certain priest was seriously ill he asked the jew to give him his blessing when he returned to Venice. The Jew was taken aback at the pope's request and hinted that not being a Christian he was not a fit person to convey the apostolic blesing.

"You need not worry about that," the pope said. "It does not matter in the least provided the goods are all right whether the wrapper is bad. You are merely the wrapper," he added, smiling, and the Jew conveyed the apostolic blessing to the dying priest.

Bird Chokes a Horse.

While in pasture a horse owned by George Miller, a farmer of Seymour, Conn., was choked to death by a swallow, says the New York Herald. The bird, in blind flash, swept into the animal's mouth, momentarily opened for an apple on an overhanging branch. The horse tore frantically about for several minutes, vaulted a fence, and was dead when reached by William Owens, a farm hand, who witnessed the incident. The bird, also dead, was found wedged in the horse's windpipe.

They Were.

Little Elsie came into the kitchen with some eggs in a basket. "Mamma," she said, "our hens are getting awfully absent-minded."

"Why dear, what makes you think so?" asked her mother.

"Look here," said the little girl, holding up a soft-shelled egg, "this makes the third one this week that they forgot to put a shell on."—Judge.

Misplaced Enthusiasm.

"Gwendoline certainly does misplace her terms of admiration. What do you think she said when the professor asked her what she thought of the trained fleas?"

"She told him they were great."

"Yes, and when we all went to see the hippopotamus at the circus she said he was cute."

Teaching Life Insurance.

No less than eighteen American universities and colleges are now giving courses in the subject of life insurance, fifteen others there are whose courses given in which part.

CARING FOR FALL LITTERS

Many Farmers Cheat Themselves Out of Considerable Revenue Annually by Thoughtlessness.

There are a great many farmers who annually cheat themselves out of considerable revenue through neglect to give proper care to fall pigs. This is not only true with farmers who raise swine to fatten, but it is often true of those who calculate to market the best individuals for breeding purposes. The importance of keeping a pig growing steadily until he has a good frame, whether intended for meat purposes or breeding, is so lightly regarded by a large per cent. of swine raisers that it gets them into all sorts of trouble. The man who grows swine to fill his fattening pens is troubled with undersized sows and runty litters and the breeder finds his pigs in small demand.

The fall litter of course suffers the most from neglect because the conditions at this time of the year are the least favorable for his growth. The fall litter is born out of season and therefore needs special care. Two points must be properly regarded; the pigs should be provided with quarters that will protect them from the cold, and should be fed generously, including warm slop at least once a day. If the latter is given at night they will undoubtedly return to their sleeping quarters more satisfied than after a cold feed. It is perhaps more important that the night feed be warm than that it carry an amount of nutrition above an ordinary kitchen slop richened with skimmilk or ground feed. It will pay well, however, to richen even skimmilk with such feeds as shorts and tankage in order to provide protein, which is nearly nearly always a lacking element in pig rations.

If the pigs receive liberal amounts of this kind of a slop the grain ration may consist entirely of soaked corn. Green food should be provided as long as obtainable.

Generous feeding of the sow as long as she seems disposed to use her food for making milk is of course the most economical method of feeding the fall pigs, but as a great many sows dry up early in cold weather it is good policy to provide the pigs with side dishes as soon as they show any inclination to take them. While there is profit in raising fall litters when properly handled there is little to be gained in raising them to shift for themselves as in this case they will render scarcely any better account of themselves in a year than spring pigs will in nine months.

CHICKEN FARM ON ISTHMUS

Started With 200 Brown Leghorn Hens and 15 Cocks—Other Varieties Afterwards Added.

The Ancon hospital poultry farm, on the Isthmus of Panama, has been in existence since January, 1910, starting with two hundred Brown Leghorn hens and fifteen cocks. In the following April one hundred hens and ten cocks of the Rhode Island Red variety were added; one month later a consignment of 230 Plymouth Rock hens and cocks was received, and in April, 1911, an addition of one hundred fowls, imported from the states, was made to the Brown Leghorn family.

During the first eighteen months of operation, January 1, 1910, to July 1, 1911, eggs to the number of 4,455 dozen were produced at the farm, of which the Leghorns laid 29,329 eggs, the Reds 9,094 and the Plymouth Rocks 15,042.

The average cost per dozen for the whole period mentioned has been about 11½ cents. The prevailing price of eggs at the commissary is 27 cents a dozen, indicating on the basis of that figure a saving of about 15½ cents a dozen, or about $280 for the seven months period.

Last year fifty-three pairs of pigeons were introduced at the poultry farm for raising squabs. During the seven months ended July 31, 1911, seventy-nine squabs were produced at a cost of 21½ cents each, the market price for squabs being 35 cents.

Protect Soil Bacteria.

The greatest damage to soil is usually done after harvest. The ground is compact, the crop is removed, and usually the rain is scant, therefore the solvent action of the water ceases, and bacteria become inactive and many die. Thus the two principal agencies that make plant food available are cut off. To guard against this the land should be cultivated as soon as the grain is cut; in fact, follow the binder with a disk. This cultivation loosens the surface soil and kills the weeds that take much moisture. The water will then be conserved and the germs protected.

Returns From Sheep.

When the sheep are first shipped in from the stock yards, or the range, it is the practice to put them on stubble fields or prairie grass before giving them grain. Unless abnormal conditions result from hammering down the prices, sheep bring good results in the market.

The Egg Shape.

It is generally conceded that there is a certain shape which a fowl must have in order to produce the greatest number of eggs. An oblong body, an equal breast and posterior part divided at the shanks, is the rule. The white Plymouth Rock seems to possess this shape more than any one other breed. There should be depth, too, so there is room for the digestive organs to do lots of work. Study your pullets and hens; select the "egg shape" much as you would the "milk shape" if purchasing a milch cow. Dispose of those not somewhere near the egg shape and give better care to those left.

Best Grain for Feed.

In buying feed, remember that white middlings is better than the brown, that white oats is to be preferred to the black, that coarse bran is better than fine, that hulled oats is better than oats with the hulls on, that white corn is not so fattening as the yellow variety, and that Kaffir corn is an excellent grain, and should be more extensively fed.

The Spirit of Dawn

By MARTHA McCULLOCH-WILLIAMS

(Copyright, 1911, by Associated Literary Press.)

Blood lines are far-flung. The pull of them had brought Sara from the western range, Elizabeth from remote Texas, back to a little New England village, the home town of their joint great-grandfather. The charm of it laid instant hold on them—they loved the staunch white houses, green-shuttered and set about with immemorial elms,

Most of all they loved Great-Aunt Martha, mistress of the old homestead. She made them welcome with a certain prim tenderness that went straight to their bubbling hearts. Notwithstanding, upon the third morning after arrival, Elizabeth, who was irrepressible, woke Sara with an impatient shake, saying:

"Think! Hard! What shall we, what can we do? We simply must do something."

"What thing needs doing?" Sara grumbled sleepily.

Elizabeth shook her again. "Bringing this place to life," she said. "It died at least a hundred years ago—don't you think it has waited long enough for resurrection?"

"I'll tell you—after I've dreamed about it," Sara mumbled, sinking back on her pillow.

Elizabeth shook her fist at her, but did not further disturb her. Instead, she hurried on her frock, tiptoed downstairs, undid the back door cautiously and slid out into the garden, the loveliest garden, in full late June bloom, overrun with spice pinks, honeysuckle, sweet Betsys and hundred-leaf roses.

Elizabeth's frock matched exactly the pink of the roses—her hair, black and silky, was braided tightly behind each ear. It was her only head-covering, so as she stood slim and virginal among the flowers at sunrise she looked the very incarnation of youth.

It was a sight to make any man's heart beat, let alone that of a young fellow, and an artist, intoxicated with

Looked the Incarnation of Youth.

the joy of the morning. Since the earliest dawn Phil Craig had been sauntering through the least frequented ways, peering into gardens, noting the creeping light, the melting shadows, now and again sketching roughly some bit that appealed especially. He had come to the village, from years of study abroad, to rest, he had told himself, not to work—yet here was work laying hold on him in the very outset.

He stood ambushed in the shade of a thick hawthorn. Elizabeth did not see him until as she turned half about, he called hushedly: "Be still! Please! Just a minute more!" his fingers flying as he spoke. As he caught her startled look, he explained: "You are the Soul of Dawn! I want to make you immortal."

That was the beginning. Elizabeth did not tell it, even to Sara. Instead, she was gracefully, and graciously distant, when the next afternoon Phil managed to have himself fetched to the house and be properly presented.

After that, Old Town village came to life with a vengeance. Phil did the most of it, fetching in autos, other young men, indeed all manner of worldly things. He refused to set up a sudio, but now and again fell furiously to work under shade of a white umbrella.

Never by any chance did Elizabeth figure in the studies. Yet she knew he made pictures of her. After a little the knowledge fretted her. Her father would not like it—of that she was sure. Neither would Billy Vance. It was all settled that she was to marry Billy, after they were both grown up. Her father thought her hardly more than a baby at nineteen—and Billy's parent had the same opinion regarding a lad of two-and-twenty.

Sara knew all about Billy, save and except his name. Sara pursed her lips comically over Craig's evident enthrallment—and once said, shutting one eye: "If there was a wireless station handy I'd sent a flash to that young man down in Texas.

But she was a good fellow—much too good to spoil sport. Elizabeth meant it all for no more than sport until, all at once, with no word of warning, Billy came to Old Town.

"Couldn't help it—with home so hot, and all the things you told of going on up here," he explained. "Hay rides and boat rides, and auto rides and everything. Gee! I felt I must get into the game."

"You'll have no trouble whatever, honey," Sara said, coming up behind Billy and Elizabeth. "I'm nobody but Sara," she went on. "Let me recommend myself, though, as the latest improved variety of gooseberry. I can look 'bless you, my children, in three languages, and seven ways at once. And you'll need to bless me—but for my vigilance Elizabeth would have been run away with long ago."

"I'd say it—even without that." Billy answered gallantly, holding both Sara's hands and looking down into her eyes. They were blue eyes, but snappy for all that. They returned his gaze steadily until Sara felt moved to say:

"You don't look Texas—not the least bit—but, then, neither does Elizabeth."

"Do not forgive us! Nobody can quite look Texas—it's the finest state anywhere," Billy answered, loyally "But we do the best we can."

A week showed that Billy could, and did, fit in beautifully. Craig, even, could not resist him after the first two hours. Billy had a way with him, as insinuating as his gentle, slurring drawl.

Elizabeth exulted in Billy—as a comrade, though, not a possession. She had been too happy to think beyond the moment—she was happy still, but with underneath a sense of disquiet. Something surprised now and then, in Craig's eyes, some inflection of his voice when he was off guard, formed the roots of the disquiet. Dimly she understood what she had come to mean to him—as dimly she felt that he ought to know the truth—yet she would rather die than tell him.

Thus, uneasy and perplexed, she turned instinctively to the thought of Sara. Perhaps, if Sara tried, she could make Craig forget—Elizabeth had a faith simply boundless in her cousin. A level head had Sara—with her, to will was to do. Elizabeth hoped she might will to captivate Craig—if it were put upon the ground of cousinly succor.

When woman disposes man sometimes proposes. At the end of a fortnight Billy's mind was made up. He chuckled a bit over the final making up, saying to his cigar: "We'll go home to get married—all of us—only thing to do—it'll pacify the judge and Marse Willyum."

Marse Willyum was his father, the judge, Elizabeth's. After his disrespectful comment upon them, Billy strolled over to the Howland place, smiling his most innocent smile.

He found things taking place there—things unusual. In the wide dim parlor rarely opened, Craig had set up a picture nearly complete, the Spirit of Dawn—Elizabeth to the life, but Elizabeth transfigured by love and the morning. Billy looked at the picture, his eyes dimming the least bit. Then he laid a hand on Craig's arm, saying: "I must have that."

Craig shook his head—he dared not speak. Billy went on: "I'll pay you a price for it. You can't deny I have the right to it."

"I won't sell it," Craig said curtly. "Even if it were finished, nobody could buy it."

"Then give it to me," Billy persisted.

Craig glared at him—Billy smiled infantinely. "As a wedding present, you know," he went on. You oughtn't to grudge it to me and—Sara," striding to that young woman, and slipping his arm about her waist. "I meant to say I'd give you the original," he added. "But I really reckon she isn't mine to give."

"Shut up! And come out on the porch," Sara interrupted, shaking her head at Billy. "Don't you see those two can't speak until they catch breath?"

"Just as you say, boss," Billy answered meekly, but chuckling hard. Over his shoulder he saw Craig and Elizabeth locked tight in each other's arms.

GOLDEN SILENCE.

Piebald was not a bad horse to look at. She had a nice white-and-brown coat, a nice bushy tail, and a nice, gentle manner. But she possessed one incurable drawback. She couldn't see. This her new owner discovered a day too late. He visited the horse dealer from whom he had bough: the steed and demanded an explanation. "She's stone blind!" he exclaimed.

"I know she is," replied the dealer.

"But—look here, man—you never told me anything about it!" spluttered the irate purchaser.

"Well, you see, it was rather a delicate matter," answered the dealer, coughing slightly. "The man from whom I bought her didn't tell me himself, so I thought," he added, lowering his voice, "he didn't want it mentioned."

"A Perfect Saw."

"To say nothing and saw wood," seems to me one of the most sagacious phrases passed down by our hard working forebears. Like most sayings which have emanated from manual labor, this is blunt, homely, and, to the loquaciously inclined, painfully accurate. Show me a man bent jack knife-fashion over a saw-horse, with a short log under his buck, and I will point out a man who is minding his own business with admirable zeal. If he must speak, he ceases to saw. While he saws he is necessarily mute. Hence this shrewd phrase, which is, punning aside, a perfect saw.—Atlantic.

The War Game.

War is an extremely simple game. A number of armed men are sicked upon another body of armed men, and they engage in the highly exciting and diverting sport of maiming and slaying one another. The contestant which can slaughter the most combatants and starve the most non-combatants is adjudged the winner. Simple, is it not?

A Resourceful Woman.

Our idea of a resourceful woman is one who can stand her family skeleton in a corner of the parlor and make folks believe it is bric-a-brac.

VEGETABLES IN A HOTHOUSE

Tomatoes and Lettuce in Greatest Demand and Return Good Profit During Extreme Cold Weather.

It is possible for those in fair financial circumstances to have a garden in the winter, although they may live in cold countries. An ordinary greenhouse and a little care can bring this about. It has been tried with good success. One woman, believing that garden truck could be grown in a greenhouse, undertook the task. Her greenhouse was built 12x18 feet, and was divided into two compartments by a glass partition to control the temperature. Her success is given in her own words:

"In one compartment of my greenhouse I raise tomatoes and string beans, along with a few roses and other flowers requiring a warm house. The second compartment is almost exclusively devoted to vegetables. Almost every variety of vegetable that grows in our gardens may be successfully raised in the hothouse, excepting green corn, peppers, eggplant and such tub-tropical plants. When it comes to money returns tomatoes and lettuce are in the greatest demand, and during cold weather bring splendid prices. Tomato plants can be depended upon to bear from November to June. The plants should be put on the benches in the greenhouse in August or the first of September in rather poor soil, as the blossoms will set sooner. When the first crop is well on, manure should be added, and the application continued all winter and spring to induce new growth, with fresh blossoms and fruit. During the first two months it is necessary to fertilize the blossoms by applying the pollen with a camel's hair brush. When the plants are older it is only necessary to jar the vines every day or so, and the pollen will spread sufficiently. I have found the Freedom, Sutton's Perfection and the Lorillard the best forcing varieties. When the vines grow too freely I prune them thoroughly. The temperature of my tomato house is kept between 60 and 70 degrees."

SHEEP RATION IS IMPORTANT

All of the Various Farm Grains Have Been Used With More or Less Success—Corn as Fattener.

The question for ration for sheep is an important one. All of the various farm grains have been used with more or less success. Corn easily heads the list as the best single grain for fattening lambs. It is especially desirable because it causes the lambs to put on fat rapidly and does not stimulate too much growth as in the case with many forms of concentrated feeds. Barley has also been used to very good advantage. It is about on a par with corn from the standpoint of rapidity and economy of gains, but lacks same in palatability. Wheat and wheat screenings have both been used to fatten lambs. This feed has too much tendency to cause the lambs to grow rather than fatten. When combined with an equal amount of corn the lambs put on fat much more rapidly. Oats is a useful feed, but like wheat is more liable to induce growth than fattening. It should be mixed with corn for best results. Oilmeal, cottonseed meal and gluten feed have all been used in conjunction with corn rations to good advantage. Not more than one-half pound of either oilmeal or cottonseed meal should be fed a lamb weighing from fifty to ninety pounds. While wheat bran in itself is not helpful in putting on fat, it is one of the best feeding stuffs available to use in conjunction with corn or other feeds in getting lambs on full feed. It furnishes bulk, thus prevents the greedy ones from getting too much concentrates and also acts as a regulator of the digestive system.

Bitter Churning.

I usually churn three times a week. Not long since the milk, after standing 24 hours, would become very bitter before souring. The butter was so bad that it could not be used. We commenced feeding the cow potatoes. The milk and butter are now free from the bitter taste, says a writer in an exchange. The utensils have always been kept clean. I now put in a tablespoonful of lime water in four or five quarts of cream. The cream ripens as it should and the butter is sweet. No milk is allowed to stand 24 hours before skimming.

Produce Most Eggs.

Hens that produce not only a goodly number of eggs, but eggs of moderately large size (weighing two ounces each on an average), Plymouth Rocks, Wyandottes, Rhode Island Reds, Orpingtons, and Leghorns or Minorcas that are used on egg farms are varieties for the best eggs.

Shipping Fruit.

Do not place your fruit in competition with another by dividing shipments in any market.

Never ship fruit to a market that is overstocked and weak. Your commission merchant will send you daily quotations on a postal card.

Trap Nests.

To find out your laying hens by trap nests is more troublesome than to discover your paying cows, for it involves releasing the hens every hour or so from the nests. The farmer can't do this, but if he has youngsters they can, and will, if approached in the right way. Give them, whether boys or girls, or both, a half share in the profits, and the problem's solved. You have done a double stroke of business; you have added substantially to your own income and interested the young ones in the farm.

Boiled Grain.

French poulterers believe in boiling the grain. It is put in a pan of water and boiled until soft enough to be easily bruised between the fingers. It is claimed that four pints of oats boiled will fill a pint measure ten times, four pints of buckwheat boiled will fill a pint measure fourteen times, four pints of corn boiled will fill a pint measure fifteen times, four pints of wheat boiled will fill a pint measure ten times, and four pints of rye boiled will fill a pint measure fifteen times.

BEADS POINT TO STRANGE THEORY

INDIAN GIRL MAKING BEADS

A STRING of little black beads, linked together with gold, brought to Indianapolis a few days ago is regarded by antiquarians of the far west as substantial evidence in support of the theory that the American Indians are of old world descent.

The beads were a present to Mrs Claire Bell, 428 North Alabama street, from her mother, Mrs. B. I. Canfield, who is a teacher in the Sherman institute, a school for Indian children at Riverside, Cal., and they are the work of the girls in the school.

The beads are pellets about the size of a pea and jet black. They are hard and metallic to the touch, but are as light as paper. The wonderful peculiarity about them is that they have a strong, agreeable odor of roses, an odor that never will leave them, and it is this peculiarity that makes them of such interest to antiquarians.

For, according to Mrs. Canfield, who received her information from a paper published by a California antiquarian who became absorbed in the study of the beads—not this particular string, but others like them made by the Indian girls of the southwest—beads remarkably similar to these have been found in the pyramids of Egypt and in temples of oriental antiquity. Those beads, in spite of the fact that they had been buried for scores of centuries, still retained a strong, delicate scent of roses.

A comparison of these beads with rare strings of beads in the possession of Indians of the southwest, who are supposed to have migrated north from the Inca settlements in Peru, showed them to be identical. As the beads were wholly unlike anything else of known existence, the conclusion was reached that the ancestors of the Indians must have been either the makers of the beads found in the pyramids or their ancestors.

White men were deeply puzzled over the composition of the beads, and it was supposed that the manufacture of them must be one of the lost arts. But when the Indians discovered the interest that had been aroused in their relics, they found that the method of making them had been transmitted through the tribe by tradition. They set to work, accordingly, and duplicated the pellets, to the astonishment of the white men.

The secret of the Indians did not remain exclusively tribal for very long, however, since a great demand arose at once for the rose-scented beads. The art was taught to a large number of the Indians, and from them it leaked out, until now there is no longer a mystery about their manufacture.

But the novelty of it is just as interesting as the mystery. The secret of the scent of roses is that the beads are actually made of rose petals.

"The Indian girls at our school hold parties to make the beads," said Mrs Canfield, "much on the order of the fudge parties of their white sisters, or more like the old-fashioned spinning or quilting parties.

"They gather bushels and bushels of rose plants, which grow, as you know, in profuse abundance in California. They grind these petals up very fine, running them through a grinder seven times seven times—you mustn't say forty-nine times, for there is a mystic significance to them in the expression 'seven times seven' which is lost in the prosaic 'forty-nine,' and this mysticism, they believe, has an important part in the result of their labors.

"When the petals are properly ground they are put into iron pans and tincture of iron is poured over them. That ends the first party, for it is necessary to let the mixture set for several days, so that the tincture will eat into the iron of the pan and color the composition black. Every time one of the girls passes a pan during this period of 'ripening' she stirs the mixture with her hands, so that it will have the proper color and consistency all the way through.

"After the mixture has 'ripened' the girls gather again to make it into beads. It is a black, viscous substance, thick enough to remain in any shape into which it may be rolled. The moisture in it has been supplied by the juice of the rose petals, which runs out in surprising quantity during the process of grinding, and by the tincture of iron.

"The girls take small quantities of this viscous substance from the pans and roll them into pellets such as you see in this string. They are very deft at the work and very painstaking, not stopping until the pellet is perfectly round.

"These pellets are then pierced with hatpins, and are strung on the pins to dry. When a big beadmaking party is given at our school there is a hatpin famine in Riverside, for the girls buy up all they can find in the stores.

"Then the Indian maidens stretch strings across their bedrooms and from these strings they suspend the hatpins to allow the beads to dry. The process of drying consumes several days, and during this time the girls very jealously avoid raising dust in their queerly decorated rooms.

"When the beads are dry they are taken off the hatpins and the little rough spots caused by piercing them are carefully polished off. You have then a neatly-pierced black, permanently rose-scented bead ready for the jeweler."

Mrs. Canfield has been in the government service for 17 years as a teacher of Indians, first in the reservation schools and finally in picturesque Riverside, and she has an abundance of first-hand information of Indian life and character that is highly interesting.

Learn White Man's Petty Grafts.

One of her regrets is that the Indian artisan, engaged in the making of blankets, baskets and other beautiful curios, is learning the vices of the white man, so that now inferior articles are being made and sold so extensively that only an expert is free from the danger of being swindled.

Their education at the Sherman institute consists of the common school education, including the eighth grade, and in addition they are given industrial training. Upon graduating from the school the Indians are at liberty to do as they please. Some of them go to the higher institutions of learning, such as the Carlisle school, and some, whose parents can afford it, enter other large American colleges.

Others go back to their reservations, where they become teachers in the reservation schools or enter into the active life of the tribe, where their superior education soon makes them leaders. Still others, attracted by their summer work, hire themselves out as skilled servants to the Californians.

A few go to the cities and become a part of the great active world of America, putting themselves upon an equal footing and in competition with white men in their chosen trades or professions. Many of these Indians have more than made good in the battle of the big city.

Romances begun at the school frequently culminate in marriage after graduation, many a stalwart Hiawatha having proudly claimed a bashful Minnehaha. Occasionally an Indian girl marries a white man, or an Indian man a white girl, but, according to Mrs. Canfield, such cases are rare in California. Mrs. Canfield believes the government is doing a great work at Riverside and at similar institutions.

Delicacies From Whales.

Delicacies made from the flesh of whales are now being put on the market by enterprising Newfoundland whalers. Among them are sausages, meat extract, canned steaks, and tongue. They are also seeking to utilize the intestines of the leviathans as substitutes for leather in various arts and industries. It is claimed that the flesh of the whales looks and tastes much like beef and can be sold for one cent a pound. The company preparing the meat for market has sold several lots in the West Indies with satisfactory results. The average whale hide contains nearly 1,500 square feet. The intestines are thin and tough and described as suitable for glove manufacturing.

Witty Irish Cleric.

Among the clerical humorists of Ireland, Father James Healy stands out prominent. On one occasion when a pretty child was proudly shown him by her mother, he remarked "My dear child, you'll have a blue lookout as long as you live!" The mother's face at first clouded, but immediately after brightened up when she saw the smile on Father Healy's face, for the child had blue eyes. Once Father Healy was asked how he would describe a Scotsman, and in answer, assuming as he spoke the Scot's accent, said: "A Scot is a mon wha keeps Sawbath and iverything else that's canny."

Loss of Appetite

Is loss of vitality, vigor or tone, and is often a forerunner of prostrating disease.

It is serious and especially so to people that must keep up and doing or get behindhand.

Manila on the Map.

The decision of the North German-Lloyd Steamship company to make Manila a port of call for its steamers plying between Bremen and Yokohama puts Manila on the map of the world in the view of the globe trotters who have up to now passed no nearer than Hongkong.

The Cablenews-American observes that it is the business future of the Philippines that causes the North German-Lloyd line to send its steamers to Manila. At any rate, the business outlook should be helped by an improvement in transportation facilities that will bring many more travelers to Manila and give it a good deal of free advertisement.—Louisville Courier-Journal.

Solving the Problem.

Bishop Goodman was one day addressing a Sunday school, when he said in a most expressive way: "And now, children, let me tell you a very sad fact. In Africa there are ten million square miles of territory without a single Sunday school where little boys and girls can spend their Sundays. Now, what should we all try and save up our money and do?"

And the class, as one voice, replied in ecstatic unison, "Go to Africa."

TO VISIT SAN FRANCISCO

Without seeing A. Andrews' Diamond Palace would be like visiting Europe without seeing Paris. It is the most magnificent jewelry store in the world. Visitors welcome. 50 Kearney street, ne[illegible] Market street. Catalogue sent [illegible]est.

REDUCING FARMING TO A TRUE BUSINESS SCIENCE

Simple System of Bookkeeping Wanted for the Farmer of Today.

Government experts have been conducting an investigation for the past eight years to develop a system of farm accounting that shall at once be simple and practical, and general in its application to the diversified conditions of our agriculture.

They have been seeking a system of cost accounting founded on business science that shall enable the farmer to determine easily and accurately the unit values in the cost of production. It is the debit side of the ledger that has been the stumbling block in all systems devised for farmers during the last fifty years. The credit side is simple in comparison. The average farmer has permitted the cattle buyers, the grain dealers, and the milk companies, whether acting as trusts or individuals, to be his bookkeepers for the credit side of the ledger. They don't bother themselves about the debit side, and neither did the farmer himself. The middlemen figure out the quantity of his products in units of bushels, pounds or quarts, as the case may be, multiply the result by the market price of the unit and hand him the cash. It is a slovenly farmer indeed who cannot tell just what his credits have been in dollars and cents for the current year. More than likely he has set them down in a yellow-covered memorandum book distributed as an advertisement for some insurance company or fertilizer concern.—The Bookkeeper.

He, Too, a Burglar.

All was quiet within the house, and the night was far spent. Thus fortune favored the burglar as he stealthily acquired the plate and valuables and put them in his capacious bag. But oh, the horrible thrill he got when an icy-cold hand grasped his wrist! It was not a ghost he saw when he flashed round with his bull's-eye, but a man with a keen look of sorrow on his dejected countenance.

"Oh, my poor, misguided friend," murmured the intruder sorrowfully. 'Would you rob me of my valuables? Think, my man, what you are doing. If you have a wife and child, what would they do if I sent you to prison?" The burglar seemed to be somewhat moved, and he dropped the stolen goods. "Turn from your evil ways, my brother," went on the intruder. "Your secret is safe with me."

Then without a word our friend made a hasty exit by the window. The kind, loving, charitable old man, having quietly lifted the swag on his shoulder, after cramming it to its utmost capacity with useful articles, also took his departure. For behold, he, too, was a burglar.

Want No More Funiculars.

In a memorial presented recently to the Swiss government the ligue for the preservation of scenery in that country asks that no more concessions should be granted for the construction of Alpine railways.

It is probable that concessions in the future may not be obtained so easily as in the past, as there is a certain amount of feeling in the country that these railways, though they certainly appeal to a large number of visitors, do not improve the beauty of the Alps.

Many of the mountaineering visitors dislike these railways, but they very seldom care to climb on foot a height which can be scaled in a comfortable carriage. Such a mountain loses all charm, it appears, for the pedestrian and he generally goes off to districts where the mountain railway has not been introduced.—The Queen.

Hobson's Choice.

Russian Official—You can not stay in this country.

Traveler—Then I'll leave it.

Russian Official—Have you a passport to leave?

Traveler—No.

Russian Official—Then you can not leave. I will give you 24 hours to decide what you will do.—Pele Mele.

At the Election.

"Why is that lady voter so indignant?"

"She wants to go back into the voting booth and write a postscript to her ballot."—Washington Star.

Fitting Reply.

"Do you know of any good remedy for a deadlock?"

"I should propose a key to the situation."—Baltimore American.

Uncle Pennywise Says:

Diogenes was a man who spent most of his time in the tub. Every boarding house has its Diogenes.—Kansas City Journal.

The Austrian sugar crop of the 1910-11 campaign aggregated 1,175,316 tons of raw sugar. Of this amount 519,424 tons were consumed in Austria and 610,359 tons exported.

Milk should never be exposed to foul air in the cow stable or in dirty tanks before it is delivered to the creamery.

Young chickens should not be cooped on land that was occupied by chickens last year.

Boards should be used for bleaching early celery. Soil is apt to cause it to decay.

Those who preach are usually the least qualified for preaching.

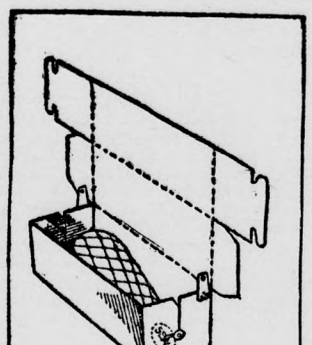
Feed corn very carefully to the pigs in hot weather.

THE ELECTRICAL WORLD

WAY TO SHIP GLASS BULBS

Englishmen Invent Receptacle for Shipping Electric Light Globes That Affords Protection.

Two Englishmen have invented a box for shipping electric light bulbs that gives ample protection to these fragile articles, yet is of small size and easy to mail. A rectangular box has a netting, open at one end and fastened to the box by the other end.



Bulb Swings in Netting.

The bulb is inserted in the open end of the netting, which is then closed by means of drawing strings and fastened in the box, so that the glass is suspended therein with room enough on all sides to prevent contact. A piece of cardboard, dotted to fold over and inclose the wooden box, is attached to the latter and forms an added protection for this. When the cardboard is folded over and fastened the package can be sent through the mails with safety. Without some special device of this kind it would require a bulky box filled with excelsior to assure safe transportation of one of these fragile globes.

CAREFUL OF 'PHONE TALK

Copenhagen Exchange Arranges Gramophone to Record Unseemly Language of Subscribers.

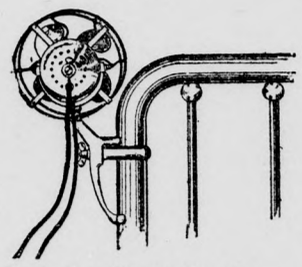
Exasperated telephone subscribers who, unable to "get through" as quickly as they would like, indulge in harsh language towards the girl clerks, have been cleverly brought to book by the telephone administration of Copenhagen.

At first it was found difficult to identify the offenders, so a gramophone apparatus was installed at the central exchange. The moment a subscriber began to use unseemly language the girl would have it recorded by the gramophone.

Some of the worst offenders were summoned to the directors' office, and when they denied their hasty remarks they were convicted by an exact repetition in their own voice on the gramophone. Telephone manners in Copenhagen have as a result greatly improved.

ELECTRIC FAN ON BED POST

Adjustment May Be Changed in Moment's Notice and General Circulation of Air Created.



Bracket for Electric Fan.

An attachment for fastening an electric fan to the corner post of the footboard of any brass or iron bed is shown in this illustration. The four prongs of the bracket are covered with felt, and, as the bracket is held securely by a piece of cotton webbing, no metal comes in contact with the post of the bed to mar its finish. The adjustment may be changed at a moment's notice by loosening the thumb screw, and the fan may be directed to blow on the bed, over it, or to create a general circulation of air about the room.

Miniature Electric Railway.

We are accustomed to seeing miniature steam railways at amusement resorts, but now for the first time we are informed of a miniature electric railway, which has been installed this year at Hershey Park, Hershey, Pa. The line is about a mile long, and of 22-inch gauge. The train that runs over this line consists of a locomotive and four flat cars, each provided with a seating capacity of about twenty people. The locomotive contains two 10-horse-power motors, and drives the train at a speed of 20 miles per hour. The locomotive is placed at the center of the train, so that the train may be operated in either direction without making it necessary to turn the train around. The line has proved such a success that it is planned to extend it next year to about four miles.

Wireless Feat.

One hour by wireless from Glace Bay, C. B., to Dakar, on the coast of French Western Africa is the astonishing feat accomplished by a recent message.

Records Power Consumption.

A recent type of electrical measuring instrument records the power consumption correct to within one per cent., regardless of temperature and current changes.

CALIFORNIA'S EXHIBIT AROUSED ENTHUSIASM

Fifty Thousand Visitors Crowd Chicago Coliseum to View Display.

Chicago.—An event of more than ordinary interest to every patriotic citizen of California occurred a few days back in this city, when some fifty thousand persons crowded into the Coliseum to witness and participate in "California Day" at the National Land and Irrigation Exposition. The enthusiasm and interest with which the offerings of the Golden State — fruits, flowers, wines, nuts, free lectures, literature and the like were received by the visitors, bore lively testimony to the fact that many of the latter have an ambition to remove from the frozen East to the Land of Sunshine.

Ten carloads of California commodities were given away to the visitors during the course of the day. The Southern Pacific Company, in addition to carrying all of this material to Chicago free of charge, occupied one of the largest spaces at the exposition and gave out hundreds of thousands of folders and other pieces of literature exploiting California. In addition they maintained free lecture rooms, where the representatives of the various communities entertained large audiences with descriptions of the farms, ranches and homes of the Golden West.

All through the day the willing Californians—of whom there were many in the vast throng—handed out oranges, apples, grapes, raisins, bunches of violets, small bottles of wines and assorted nuts. The distribution was superintended by J. H. O'Neil, T. P. A. of the Southern Pacific lines, and W. H. Smith, superintendent of the department of publicity. "California Day" was unanimously voted to be the hit of the exposition and accomplished a world of good for the entire Pacific Coast.

He Must Go.

"The office boy wants to go to the ball game today," said the junior partner.

"Let him go," said the senior partner.

"But he's been every day this week."

"Well, unless he goes to the ball game every day, how are the rest of us to keep posted?"—Today's Magazine.

Humor Amid Danger.

"One of the characteristics of my old comrade, Amos Stillman, Co. A, 23d Mass. volunteers, was bravery in actual fighting service," said the old soldier. "Another characteristic was a sense of humor which stood him in good stead even in the face of danger, and contributed not a little to the gayety of his comrades.

"At the battle of Cold Harbor, just before making the charge and while under the Confederate fire, our corporal, who was over 6 feet tall and scarcely bigger around than a gun barrel, became excited as the enemy's bullets plowed up the earth about him.

"'What kind of a place is this to keep a man in?' he demanded. 'Absolutely without protection!'

"He had no more than spoken when private Stillman stuck his ramrod in the ground.

"'Here, corporal,' said he, 'get behind this.'"—Youth's Companion.

Two Aims Join in One.

The end of all schools—high and low—must be life, or public education will fail, and the fabric of democracy rests upon education. To aim at a cultural target and hit it once in a thousand times, with a waste of the other shots, is folly. We may with propriety and good sense keep all that is cultural in our educational system. There is always need of it. But in keeping the cultural part of our education, we must provide also for the practical, the vocational.—William Allen White.

So Impractical!

"You can't please some men," says the strong-jawed woman. "Now, take my husband, for example. He is never satisfied with what we have for dinner."

"Why don't you find out what he likes and make up your menus from the list?" asks the friend,

"I know what he likes. He has told me often enough. But practically every dish he suggests is something I haven't any use for for."—Judge.

His Opinion.

She—Anyhow, you must admit that he is a well read man. Did you notice his knowledge of Aristotle?

He—I did, and if you want my candid opinion, I don't believe he's ever been there.—Sketch.

Any Help?

A little boy who had often heard his father talk about the civil war finally asked: "Father, did any one help you put down the rebellion?"—Collier's.

At the Boarding House.

Hostess—How do you find the meat, Mr. Jones?

Jones—Only by the greatest perseverance!—London Opinion.

The Athletics and White Sox had quite a race for fielding honors in the American League last summer. The world's champions won out by .004 points.

The Philippine Government is planning to establish a model rubber plantation at Iwahig penal colony, planting 200 acres as the initial step.

When a hog reaches 200 pounds in weight it requires extra good care and an expert feeder to continue to lay on flesh at a profit.

Do not hurry the mare that is with colt when she is eating. She ought to have plenty of time to chew her feed well.

The sale of chewing gum at ships' stores has been prohibited by order of acting Secretary of the Navy Winthrop.

If the pig is stinted in its food at any stage of its life, it can never become a perfect pork producer.

The hog on pasture requires 20 per cent less grain to make a gain of 100 pounds in weight.

A silo should not be less than 30 feet deep or more than 12 or 14 feet in diameter.

Artificial heat in the hog pen is not necessary. Freedom from drafts is better.

It is often a good plan to turn weaning lambs into the cornfield.

The "perhaps" man rarely gets into propinquity with prosperity.

Conscience is a nag that knows the win-out way.

Never mix warm cream with cold cream.

A switch in time flags the reping.

RAILROAD DEVELOPMENT IN THE PHILIPPINE ISLANDS

Present Method of Handling Freight Could Be Much Improved.

During the course of an address to a distinguished body of Manila citizens W. Cameron Forbes, Governor-General of the Philippine Islands, said that miles of railroad have been added to the miles in operation, or a total increase of 366 per cent. The railway served a population of 698,300 in 1898. The population now catered to is 2,000,000. The government's contracts with steamers have resulted in a regular and better service, and the rates for merchant marine are more reasonable. Unfortunately, the present method of handling freight leaves much to be desired. The connection between the existing warehouses, retail stores and the river wall is poor and will remain so until the railroad is got in. He had many times publicly and privately expressed the attitude of the government toward the coming of capital. They not only welcome it, but are willing to go out of their way to attract it by expressing the friendly attitude of the government.

Distemper

In all its forms, among all ages of horses and dogs, cured and others in the same stable prevented from having the disease with Spohn's Distemper Cure. Every bottle guaranteed. Over 500,000 bottles sold last year. $.50 and $1.00. Good druggists, or send to manufacturers. Agents wanted. Write for free book. Spohn Med. Co., Spec. Contagious Diseases, Goshen, Ind.

A Swift One.

"Now, if I were only an ostrich," began the man at the breakfast table, as he picked up one of his wife's biscuits, "then—"

"Yes," interrupted the patient better half, "then I might get a few feathers for that old hat I've worn for three winters."—Chicago News.

San Francisco, Nov. 27.—The Board of Directors of Heald's Business College recently passed a resolution authorizing the Committee on business practice to make some important changes in this branch of the work in the Heald Schools. These colleges, ten in number, have a system of trade among the several schools and has long been recognized as the most efficient method of teaching students actual business practise. By this plan the student actually learns to do things as they are done in the business office.

Airy Raiment.

Since little Paul wrote his composition on snow his mother hopes that he may be a poet.

"I don't really know what snow is," he began, "but I think it may be air with clothes on."—Youth's Companion.

A Predicament.

Wayside Blacksmith—Your automobile, sir, will have to have an overhauling. Disconsolate Owner—Yes; but how in the dickens am I to haul it over?—Baltimore American.

Fruitage Blesses All.

I think every man ought to carry his boughs so full of fruits that they will fall by the weight of their own ripeness for whoever needs to be refreshed.—Beecher.

According to F. A. Huntley, horticultural commissioner of the State of Washington, there are 6,936,389 apple trees in Washington, that are over four years old, covering 126,116 acres.

Along with scientific farming must be scientific marketing of the products of the land. Proper distribution will make glutted markets impossible.

The only hog pasture crop that may be sown now to furnish fall feed is cowpeas or sorghum.

Particularly the Ladies.

Not only pleasant and refreshing to the taste, but gently cleansing and sweetening to the system, Syrup of Figs and Elixir of Senna is particularly adapted to ladies and children, and beneficial in all cases in which a wholesome, strengthening and effective laxative should be used. It is perfectly safe at all times and dispels colds, headaches and the pains caused by indigestion and constipation so promptly and effectively that it is the one perfect family laxative which gives satisfaction to all and is recommended by millions of families who have used it and who have personal knowledge of its excellence.

Its wonderful popularity, however, has led unscrupulous dealers to offer imitations which act unsatisfactorily. Therefore, when buying, to get its beneficial effects, always note the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package of the genuine Syrup of Figs and Elixir of Senna.

For sale by all leading druggists. Price 50 cents per bottle.

Well Supplied.

A young woman of Baltimore, who recently entered upon the happy state, knows so little about housekeeping that she shudders lest the butcher and the baker and the rest of the tradesmen discover her ignorance. She orders only articles with which she has some acquaintance, and ends her business interviews as quickly as possible.

On one occasion this young wife was feeling rather puffed up by reason of some newly acquired knowledge of things domestic, when the ashman came through the street, uttering his usual cry:

"Ash-ees! Ash-ees!"

As the man neared her window she grew more and more perplexed. "What on earth is he saying?" she asked herself. At last he appeared at the back door, and there she confronted him.

"Ash-ees?" came in a husky guttural.

For a moment she looked at him hesitatingly. Then, drawing herself up with great dignity, she replied:

"No, I do not care for any today."—Lippincott's.

True Wealth.

There is no wealth but life, including all its powers of love, of joy, and of admiration. That country is the richest which nourishes the greatest number of noble and happy human beings; that man is the richest who, having perfected the functions of his own life to the utmost, has also the widest helpful influence.—Ruskin.

Keep Up the Allmony.

"Now," asked the lawyer who was drawing up the will, "is there anything more that you wish to have mentioned?"

"You've just said I want all my just debts paid, have you?"

"Yes."

"Well, just add that the women to whom I have been paying alimony are to have their regular allowances right along."

The value of manufactures passing out of the United States in the calendar year 1911 may exceed one billion dollars. This estimate is based upon figures of the Bureau of Statistics, Department of Commerce and Labor, covering the exports of manufactures in the nine months ending with September, 1911.

The exclusive use of lumber produced in the Philippines in all construction work for the Government in the Philippines is a new policy announced at Manila. It involves establishing large Government lumber yards for storing lumber until it can be properly cured.

Backache

Is only *one* of many symptoms which some women endure through weakness or displacement of the womanly organs. Mrs. Lizzie White of Memphis, Tenn., wrote Dr. R. V. Pierce, as follows:

"At times I was hardly able to be on my feet. I believe I had every pain and ache a woman could have. Had a very bad case. Internal organs were very much diseased and my back was very weak. I suffered a great deal with nervous headaches, in fact, I suffered all over. This was my condition when I wrote to you for advice. After taking your 'Favorite Prescription' for about three months can say that my health was never better."

Dr. Pierce's Favorite Prescription

Is a positive cure for weakness and disease of the feminine organism. It allays inflammation, heals ulceration and soothes pain. Tones and builds up the nerves. Do not permit a dishonest dealer to substitute for this medicine which has a record of 40 years of cures. "No, thank you, I want what I ask for."

Dr. Pierce's Pleasant Pellets induce mild natural bowel movement once a day.

W. L. DOUGLAS

SUMMONS

In the Superior Court of the State of California, in and for the County of Santa Clara.
Ida Von Henn Burke, Plaintiff, vs. Leland Herbert Burke, Defendant.
Action Brought in the Superior Court of the State of California in and for the County of Santa Clara, and the Complaint filed in the office of the Clerk of said County of Santa Clara on the 20th day of October, 1911.
The People of the State of California send greeting to Leland Herbert Burke, Defendant.
You are hereby directed to appear and answer the Complaint in an action, entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Santa Clara, within ten days after service on you of this summons, if served within this County, or within thirty days if served elsewhere.
And you are hereby notified that unless you so appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the Complaint as arising upon contract, or will apply to the Court for any other relief demanded in the Complaint.
Given under my hand and the seal of the Superior Court of the State of California, in and for the County of Santa Clara, this 20th day of October, A. D. 1911.
HENRY A. PFISTER, Clerk.
L. D. BOHNETT,
Attorney for Plaintiff.

TAXES 1911

OFFICE OF THE TAX COLLECTOR
COUNTY OF SANTA CLARA, CALIFORNIA
San Jose, California, October 5, 1911.

Notice is hereby given that the taxes for the year 1911 will become due and payable October 9th:
First installment. Taxes on all personal property, a lien on or secured by land, all special taxes, and one-half of the taxes on all real property are delinquent on November 27, 1911, at 6 o'clock P. M., when 15 per cent. will be added to all of said first installment remaining unpaid.
Second installment. The remaining one-half of taxes on all real property will be due and payable January 2, 1912, and delinquent April 22, 1912, when 5 per cent. will be added to all taxes remaining unpaid.
Taxpayers may, if they desire to do so, pay the whole tax at one payment.
For the purpose of receiving taxes I will be in the several townships of the county as follows:
At the Bank of Campbell, in the town of Campbell, on Wednesday, October 18, 1911.
And at my office in the Hall of Justice Building, cor. St. James and Market streets, San Jose, Cal., daily, Sundays and Legal Holidays excepted, from 9 A. M. to 5 P. M., to and including, Monday, November 27, 1911, and Monday, April 23, 1912 at 6 o'clock P. M.
The second installment of taxes is payable at my office in the Hall of Justice Building, San Jose.
WM. A. JANUARY,
Tax Collector of Santa Clara County.

Southern Pacific Boosts California as Home State.

"California has room for every man who will work."

"Charley" Fee, Californian first and passenger traffic manager of the Southern Pacific railroad company second, thus summarized the need of California in a recent conversation with a group of business men of the state. Advancement of the interests of the land of sunshine and dollars to the pinnacle among the other states of the nation to which she is properly entitled was the subject that had brought the men together.

"Development of the community spirit among the people of the state until they present one solid front is needed to secure the best results," said Mr. Fee, "and that is what we all must strive to bring about. We men of the Southern Pacific have learned, as have thousands of others in California, that advertising is the best way to secure men of brains and brawn, who have a little capital, to come here and settle, and we also have discovered that one of the best ways to advertise for the right sort of men is at the Land shows like those held in Chicago and Omaha.

"The results obtained at these expositions last year are sending us back there this fall, and we want to take California with us. Not as she went last year, in scattered communities, but as a united state. We have proved the results to be obtained, now we intend to reap the harvest, and California will reap it with us. The railroad will be represented with lecture halls, where we will set forth by lecturers and by moving picture and stereopticon the advantages to be gained from a residence here.

Psychological Time is at Hand.

"The people of California and the men of the Southern Pacific have had their misunderstandings in the past. Some of our moves have been criticised, but time has shown that what was done was for the permanent good of the state. To-day, I am glad to say that there is a better spirit shown on both sides. Now is the psychological time to get together for the interests of all.

"I am a Californian first and a Southern Pacific man second. My home is here; and it is highly gratifying to me that Californians are coming to a realization of the fact that the Southern Pacific has the state's best interests at heart. California has produced the greatest railroad men in the world. She has sent them to the East and other parts of the West, and they have made good wherever they have gone. They have built roads where other men have said roads could not be built.

First to Search World for Men.

"Our railroad was the first to send its agents to Europe to seek out the best men and bring them to California to make their homes. We brought winegrowers that planted vineyards and helped build up the great grape industry of the state. We brought fruit growers and other tillers of the soil.

"A conservative estimate of the number of families we have brought into California is over 250,000," said Mr. Fee. "Government statistics show that each family is worth $3,000 to the commonwealth in which it resides. That means that we have added from this source alone $750,000,000 to the state's resources, because these were permanent residents.

Railroad Increases Land Values.

"There are in this state millions of acres of land that will grow just as bountiful crops as any land in the state, but there is lack of people to thoroughly till the soil. The lands of California that to-day are worth as high as $1,000 an acre were not worth more than $5 a comparatively few years ago. It is the railroads and the speedy transportation that they give, together with increasing population, that have increased their value. The people of California are coming to realize that this is true, and that the partnership that exists between its people and its railroads is really a close one, and that co-operation is needed to obtain the best results.

"When the double tracking now being done by the Southern Pacific railroad is completed we will have the longest stretch of double track of any railroad in the world," continued Mr. Fee, "and it will give to California practically express service for all their freight to the east. Our lines in the state radiate in many directions, and we are thus enabled to bring the furthermost parts of the commonwealth into close touch with the great markets not only of California but of the east and the world.

"Therefore it is up to all of us Californians, whether railroad men, merchants, manufacturers, horticulturists or farmers, to get together. We must establish this community spirit that already is securing a hold, and we must establish it so firmly that nothing can disrupt it.

Community Spirit Was Lacking.

"At the last land show in Chicago California was not adequately represented because the state as a whole had not awakened to the significance of such exhibitions. Many counties had exhibits and mighty fine ones, but there was no spirit of unity. And yet on California day the people of Chicago forced their way into the big Coliseum, where the United States Land and Irrigation Exposition was holding this exhibit and clamored for a sight of the wonderful products. It was the biggest day of the two weeks, and the carload of fruit given away was one of the best advertisements the state ever had.

"When the Southern Pacific saw that the movement to tell that part of the East what California was doing had not taken hold as it should we turned in to remedy it by undertaking to cement the whole state display with a general exhibit supported by lectures on California illustrated by stereopticon slides and motion pictures. True, that was a big advertisement for the Southern Pacific, but it was a bigger one for the state.

"This year the manner of exhibiting should be changed. We want the state as a whole to come in. We want every town and every community from Del Norte to San Diego to come with us. If those who take exhibit space will send their exhibits to me I will see that they are carried free of all charges to Chicago. We would like to do more, but cannot because of the restrictions of the interstate commerce law.

"It makes no difference whether these exhibits come from communities along our line or not we will handle them free. We are for the state as a whole and we want to see it prosper.

Interests Same as Those of State.

"There is a very natural reason for this. Our interests are identical with those of every person in the state. In the prosperity of California and Californians lies our prosperity. Of course we increase our business, but it is only by increasing the business of the people of California that we can increase ours. Our property is here just as is that of other men and women. Many of our stockholders live here. We want all California to prosper because we are Californians. The man who owns a two-room cottage and makes his home there with his family is no more interested than we, for we pay taxes just as he does, so it is only natural that we want the state to prosper.

"We have for years been actively furthering the interests of California by far-reaching advertising campaigns throughout the East and abroad. Millions of pieces of literature have been placed in the hands of interested people and thousands of pictures have been hung in conspicuous places throughout the country. Photographs are printed in great numbers for use in illustrating special articles about California. We are at the present time supplementing and emphasizing our other advertising work by keeping a corps of lecturers constantly in the field. Such special occasions as these offer communities along our line a splendid opportunity to gather up the results of the work we have done and the interest we have aroused. I cannot too strongly urge the fact that every community wanting new residents and hastened development should have specific and energetic representation at the Chicago Land Show.

"Let us get together, pool our resources and tell the world in convincing fashion what we have. Our lecture halls at the land show will be thrown open to California communities free of all cost. Back your lecturers up with moving picture films and stereopticon views and you will be surprised at the results. Last year 77,000 persons heard our lectures. This year 100,000 will listen.

"Every business man in California should have on his stationery the line 'California has room for the man who will work.' Make that our slogan and pound it into every man we can reach. Then get together with the Southern Pacific and show what team work between real Californians can do and we will people the state with men and women that will be a credit to us, add to our own as well as their wealth and help boost California to the topmost round on the ladder of success."

Will Trade For Town Property
12 Acres $4500.00
Located near foothills near station on cut-off railway. Few cherries, 7 or 8 acres in French prunes. Balance Blenheim cots. 5-room cottage, well and city water, barn, etc. Will take town property from $1000 to $3000 in part payment and will let the balance stand at 6 per cent net.

Burbank Tells of His Latest

The Thornless Blackberry Has Arrived and with It a New Pear

Luther Burbank, after ten years of experimenting, has been able to produce a blackberry bush that is robbed of its thorns. While Burbank was showing a party of boys about his gardens, he said:

"Now I will show you something about which nothing has been said as yet. It is the thornless blackberry. It has not been distributed yet, and possibly will not be for some time. You see, I have to be careful about stating anything until it is a reality."

Burbank broke off some of the branches from the bush and they were carefully examined by the visitors. There were no thorns visible, the surface of the branches being as smooth as silk. The fruit is said to be of exquisite taste and quality.

Burbank told the boys he had worked ten years on the blackberry bush in the endeavor to remove its thorns.

Senator Thomas P. Gore visited Burbank and was intensely interested while the scientist talked to him of his work. Burbank presented the senator with an immense pear, a new addition to the pear world and one of his latest creations.

"What is the name of the pear?" queried Senator Gore.

"I have not had time to name it yet," was the reply.

The new pear is of unusual size and its flavor is superb. Senator Gore got the first one that has left the Burbank orchard.—Fairfield Enterprise.

The Youth's Companion Is for Everybody

Of course if you are too young to read, or so old you have forgotten how, you may not enjoy The Youth's Companion. That is rather a sweeping statement, however, for hosts of children love to have the stories and jingles of the Children's Page read to them. There is many a grandfather and grandmother whose eyes are dim who like nothing better than to sit and listen to The Companion stories and articles. Many a blind person, and even those who in addition can neither speak nor hear have been cheered by The Companion, its contents having been communicated to them through the finger-tips of friends. The reading of The Youth's Companion is a pretty sure cure for all kinds of loneliness. Robinson Crusoe would have been a happier man if he could have had his Companion Thursday as well as his man Friday. Just send for the Prospectus for 1912 and sample copies of the paper.

We think you will agree, when you have read them, that no other paper gives quite so much of such a high quality as The Companion, and it costs only $1.75 now for the 52 weekly issues. On January 1, 1912, the subscription price will be advanced to $2.00.

The new subscriber receives a gift of The Companion's Calendar for 1912, in ten colors and gold, and all the remaining issues of 1911 free from the time the subscription is received.

THE YOUTH'S COMPANION,
144 Berkeley St., Boston, Mass.
New Subscriptions Received at this Office.

What Would You Like to Be?

You can never attain it by dreaming. You must start something. And you must start right. Many a young man and young woman today enjoys a position of influence and honor because they started with a practical business education. Don't hesitate another day—write to

HEALD'S

Business College, San Jose, for their new prospectus.

Mr. J. W. Grigsby, of Napa, is very low and not expected to live. Mrs. Grigsby will be remembered as Mrs. Dan Coates, who married and went to Napa last year.

Don't Walk
When you can buy new highgrade bicycles at $25 and $30—why walk?
The Cyrus at $25 is a remarkable wheel. Both ladies' and gentlemen's models.
The Crown at $30 is another wheel that is attracting much attention.
Both of these wheels are made with genuine Fauber hangers and cones—guaranteed for the life of the bicycle.

You'll save money here. A general merchandise store of this kind, furnishing supplies of every kind for home and farm, operates at less cost than an exclusive store—and is able to sell at a closer margin of profit.
It's not necessary to prove it. You know it, you have ever bought supplies from us. And if you haven't, you will know it when you do come.
Mail Orders Filled
Write for descriptions and quotations. No mail order house can beat our prices on goods of the same quality.

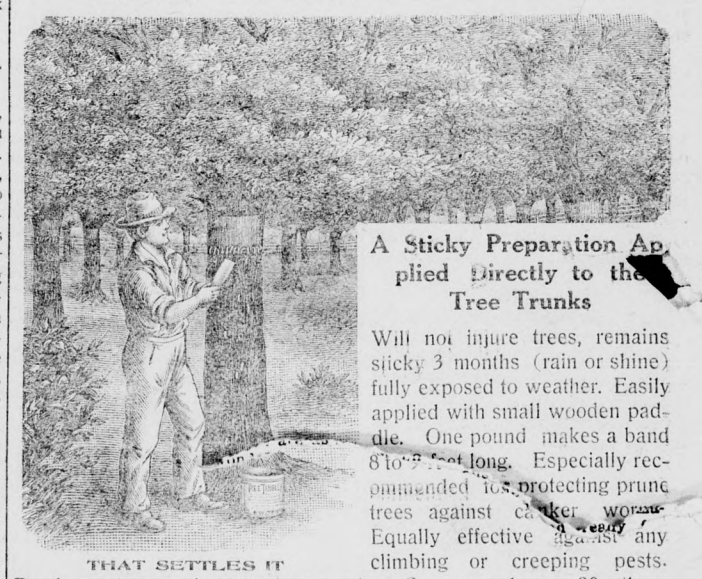
TREE TANGLEFOOT



THAT SETTLES IT

A Sticky Preparation Applied Directly to the Tree Trunks

Will not injure trees, remains sticky 3 months (rain or shine) fully exposed to weather. Easily applied with small wooden paddle. One pound makes a band 8 to 9 feet long. Especially recommended for protecting prune trees against canker worms. Equally effective against any climbing or creeping pests. Band your trees early to get best results. One pound cans 30c, three pound cans 85c, ten pound cans $2.65, 20 pound cans $4.80.
Representatives: **The C. B. Jennings Co.**, 24 California St., San Francisco, Cal. Send for booklet.

GYPSUM
Makes Larger and Finer Crops . . .

Changes heavy clay and adobe soil to lighter soil, similar to loam.
Liberates potash so plants and trees can take it up.
Helps other fertilizers to do their work better, and supplies lime and sulphur.
Gypsum is especially valuable for orchards, enabling water and air to go down further into the soil. This means healthier trees, finer fruit, and larger crops.
Send for descriptive circular.
